Re: Personal Letter of Reference for **Andrey Khataev**

To Whom It May Concern,

Please note that this is a personal letter of reference written in my individual capacity. The opinions and views expressed here are entirely my own and do not represent the official position, endorsement, or views of Clario or any of its affiliates. This letter speaks to the experiences I have had with Andrey over the course of my leading the organization.

It is my sincere pleasure to recommend Andrey for any software engineering or technical leadership role he pursues. I had the privilege of working closely with Andrey during his time as a Team Lead for a software development team engaged through our Serbian contracting partner, 4Create. Over the course of more than five years, he consistently demonstrated exceptional technical skill, professionalism, and leadership — and his contributions have had a lasting, measurable impact on our platform.

Andrey brings a broad and deep technical skill set to every project he undertakes. His expertise spans AWS cloud infrastructure, Ruby, TypeScript, React, and SQL, and he has demonstrated a strong command of software architecture principles throughout our engagement. He was instrumental in making sound architectural decisions that balanced immediate delivery needs with long-term scalability - a balance that is genuinely difficult to strike and all too rare in fast-moving product teams.

Perhaps most notably, Andrey was a central contributor to growing our platform from its earliest stages into a mature, production-grade product. Under his technical leadership, the platform scaled to support over 30,000 users and more than 300 clinical trials - an achievement that speaks to both the quality of the engineering work and his ability to keep a distributed team aligned and productive over a sustained period. He approached this growth with a thoughtful, methodical mindset, never sacrificing code quality or system reliability for the sake of speed.

As a team lead, Andrey proved to be a reliable, collaborative, and proactive partner. He communicated clearly across time zones and organizational boundaries, mentored junior members of his team, and consistently went beyond the scope of his immediate tasks to contribute to broader product discussions. He is the kind of engineer who takes genuine ownership of the work - someone who follows through, raises issues early, and delivers on his commitments.

The conclusion of Andrey's engagement with Clario is the result of regulatory constraints that prevent us, as a US-based company, from continuing to contract with him and in no way reflects on the quality of his work or our confidence in him as a professional. Losing his contributions to our team is a genuine loss, and we are grateful for everything he brought to Clario and our team over these five-plus years.

I recommend Andrey without reservation. Any organization that brings him on board will be fortunate to have his talent, dedication, and experience. Please do not hesitate to reach out if you have any questions.

Sincerely,

Mark Fuchs
Director of Technology and Innovation, Clario *(Personal Capacity)*
