SKILLS

- **Languages:** Ruby, Javascript, Typescript, SQL
- **Frameworks and libraries:** Ruby on Rails, React, React Native, Trailblazer, dry.rb, Vue/Nuxt, Roda/Sequel
- **Databases:** MySQL, PostgreSQL
- **Background Jobs:** Sidekiq (Redis), Sneakers/Kicks (RabbitMQ), Shoryuken (AWS SQS)
- **Cloud services:** AWS, Heroku, Render, Gitlab CI/CD
- **Other:** Docker, DevOPS, Linux

WORK EXPERIENCE

Oct 2024 - Present | Remote

Senior Full-stack Developer, Team Lead — Clario, TAP Mobile Project

React Native, Typescript, Ruby on Rails, Sidekiq, Docker, Gitlab CI/CD, MySQL, AWS

- Participated in re-assembly of a team for new project (accompanying mobile application in React Native)
- Facilitated architecture foundation of a new project:
  - replicated development cycle and release practices of parent project (trunk based development, release delivery)
  - sentry setup, debugging and fixing problems with sourcemaps generation
  - adaptation of mobile app working with session based Rails API according to security team recommendations
  - led architectural meetings
- Integrated POC of a dockerized Python microservice to process dermatological images uploaded from mobile app. Set up Gitlab deployment pipeline for it.
- Led data recovery process after inadvertent data loss on production
- Other frontend and backend tasks

Dec 2022 - Oct 2024 | Remote

Senior Full-stack Developer, Team Lead — Clario, TAP Project

Ruby on Rails, Sidekiq, MySQL, React, TypeScript, AWS

- Contributed to building of a new reporting module with significantly better UX and performance (I laid out backend architecture). This allowed to reduce report generation time from minutes or even hours to seconds
- Refactored worklist module (improved UX and performance based on data denormalization and doing calculations during the time events happen rather than re-calculation on the fly during index page load)
- Implemented performant data aggregation API for dashboards using similar principles as above
- On-call duties: release preparations, deployments

Oct 2020 - Dec 2022 | Remote

Senior Ruby Developer — Clario, TAP Project

Ruby on Rails, Sidekiq, React, AWS

- Backend development (business logic in Trailblazer, API design, tests)
- Contributed to frontend development (React):
    - redesigned UI component to set schedule for recurring tasks (report generation, data synchronization with external data sources)
    - participated in Backbone to React refactoring
- Participated in POC to extract Roda/Sequel microservice from Rails monolith

Dec 2017 - Sep 2020 | Moscow, Russia

Ruby Developer — Balance Platform LTD

Ruby on Rails, Sneakers/RabbitMQ, Microservice architecture, PostgreSQL

- Designed and developed code for financial services (mortgage pipeline)
- Developed and maintained REST APIs
- Migrated monolithic app to microservice architecture
- Developed and optimized SQL reports
- Created admin panels with ActiveAdmin
- Corporate Ruby gems development

May 2017 - Dec 2017 | Moscow, Russia

Ruby Developer — Progress Soft LTD

Ruby on Rails, PostgreSQL

Mortgage pipeline project was at stage of early release and it was experiencing a lot of problems due to team change and rush in development. I was responsible for backend stabilization and bug fixing.

Nov 2016 - May 2017 | Moscow, Russia

Ruby Developer — Sila Znaniya (Power of Knowledge) LTD

Ruby on Rails, Sidekiq, PostgreSQL, Drone CI

"Electronic queue" project

- Backend development
- Introduced tests to stabilize codebase
- Set up and maintained CI/CD (drone.io) as a natural continuation of previous effort
- Introduced security policies for users (devise-security gem)

Sep 2006 - Jun 2016 | Moscow, Russia

Developer — PSIT LTD

C#, WPF, XAML, Oracle, SQL, PL/SQL

- Development of different modules in 3Card-R banking system for retail clients
- Desktop development (C#, WPF)
- Writing stored procedures in Oracle DB (PL/SQL) for mass data processing/export
- Automated scheduled database scans for unwanted clients, extremists
- Data exports to State Tax Body
- SQL report creation
- CI setup/maintenance (CruiseControl.NET)

Oct 2005 - Sep 2006 | Moscow, Russia

IT Department Engineer — Bank Elektronika

Oracle, SQL, PL/SQL

- Developed/maintained modules of bank's IT system (Rs-Bank)
- Stored procedures development in Oracle DB

Jan 2004 - Dec 2004 | Astrakhan, Russia

IT Department Engineer — Pension Fund of Astrakhan City

- IT support

Side projects

Service Eazy NDFL - automation of tax reporting for Russian investors into foreign assets

Ruby on Rails, Vue/Nuxt, Sneakers, RabbitMQ, dry.rb, Heroku/Render/Dokku, Github Actions

Co-founder, responsible for entire technical stack (Cloud infrastructure, Backend, Frontend)

EDUCATION

Bachelor in Applied Computer Science in Economics
Astrakhan State Technical University, Astrakhan, Russia
Graduated: Jun 2005

CERTIFICATIONS

- **Professional Ruby on Rails development**
  [thinknetica.com] (Moscow, Russia, Online) — May 2016
- **Machine Learning course (certificate)**
  Stanford University — May 2015
  Certificate
- **CS169.2x: Software as a Service (certificate)**
  University of California, Berkeley — Dec 2013
  Certificate
- **CS169.1x: Software as a Service (certificate)**
  University of California, Berkeley — Nov 2013
  Certificate
